

9500BU

PROFESSIONAL AUTOMATIC STEAM IRON STATION

The 9500BU provides continuous steam for an unlimited amount of time when it's hooked up to a direct water line or with the available 2 gallon water container. There's no more down time waiting for the boiler to re-pressurize. The 9500BU is the perfect choice for environments that require large volumes of uninterrupted steam.

The 9500BU excels at producing quality, dry, pressurized steam. Pressurized steam is the fastest and most efficient way of ironing. It allows the fibers of the fabric to be softened quicker, with the weight and heat of the iron laying the fibers down flat. This creates the crisp and clean finish demanded by professionals.
